

Genetic ID®

Integrity, Confidentiality and Security

Trust is the foundation of Genetic ID, built into every company policy and business practice, including the strictest confidentiality and security safeguards in the industry.

- **Confidentiality** is the cornerstone. All information provided by clients is held in the strictest confidence and not shared with any outside parties. This information is used only in conducting business between the client company and Genetic ID. Test results are shared only between one designated person at Genetic ID and one designated person at the client company that ordered the test. This policy applies to both test findings and the names of all clients, with exceptions only upon the client's written authorization.
- **Security.** Genetic IDs electronic security and traceability systems are configured to the highest standards of the IT industry. Coupled with strictly enforced standardized procedures for handling samples and data, this powerful LIMS (Laboratory Information Management System) protects clients' analytical results and identities and also ensures impartiality. Laboratory personnel never know which samples belong to which clients.

- **Integrity** is a commitment to rigorous science, honest counsel, and full client support, especially when a client company's products or test results may be challenged – Genetic ID stands ready with expert help.

On both sides of the table, Genetic ID is respected and trusted. Client companies, government officials, and agencies around the world recognize Genetic ID for its expertise and its rock-solid integrity. Third-party certification through Genetic ID's Cert ID program is an internationally accepted mark of quality assurance and regulatory compliance. Genetic ID's confidentiality, security, and integrity are accepted by all as a basic framework for conducting business.
