

Sustainability and Aquaculture, a Contradiction? An example for a Conservationist Approach in Vietnam

Gieseler, J.S., Stark, M. & Bächli, R.¹

Keywords: shrimp farming, ecological and organic aquaculture, mangrove forests

Abstract

Aquaculture represents one of the fastest growing food-producing sectors worldwide. Already today, nearly 50% of fish consumed comes from aquaculture production. This paper explains measures to make aquaculture sustainable and environmentally friendly, while achieving products that meet the demand of today's markets. Based on a long-term shrimp farming project in Vietnam, different aspects are discussed.
